Home Performance with ENERGY STAR helps you improve the comfort, safety, durability and energy efficiency of your home. Buying your home was one of the largest investments you have made. Now you can enhance your home's performance by making improvements that are smart for you, your family and the environment.

THIS WHOLE HOUSE

Home Performance with ENERGY STAR works with a network of trained professionals to identify the cause of problems within your home, and to provide solutions to these problems. Our goal is to enhance the comfort, safety, durability and energy efficiency of your home. Keep reading to learn more about our program.

HOW WILL YOU BENEFIT?

Identifying and solving any home performance problems benefits you in multiple ways:

- Added comfort – determining needs for adequate insulation and finding air sealing opportunities that will result in draft-free rooms
- Added safety – testing combustion equipment in the home, such as water heaters and heating systems and identifying whether any indoor air pollutants are a threat
- Better resale value and improved condition of your home – solving problems that you may be concerned about, such as drafty rooms, window condensation, ice dams, mold and mildew
- Added durability – getting to the bottom of existing moisture issues and identifying problems before they occur
- Expert partnership – a network of trained professionals, committed to providing you with a superior product and service
- Greater energy efficiency – an optional computer analysis of your home will predict energy savings for each energy improvement made

Plus, when you utilize the services of Home Performance with ENERGY STAR, you get the added

benefit of knowing you're helping preserve Wisconsin's environment and resources. Less energy used means fewer environmental impacts on our air, water and land. Saving energy also helps the state's economy.

THE EXPERT PARTNERSHIP

Consultants partnering with Home Performance work closely with trained professionals to provide pre-performance evaluation and post-performance verification and inspection:

Performance Evaluation

- A look at your home's structural and mechanical features before work begins
- To identify opportunities that will allow you or your contractor to maximize the comfort, safety, durability and energy efficiency of the planned changes or renovations to your home

Performance Verification and Inspection

- The testing process that occurs after the completion of your project
- To verify the highest quality home improvements
- To maintain a quality living environment

REMODELING YOUR HOUSE?

If you are remodeling your home—whether changing a bathroom or doubling the size of your home—ask your remodeling professional about Home Performance with ENERGY STAR. Any change that is made to your home can affect the comfort, safety and durability of your home. A Home Performance with ENERGY STAR assessment will provide the necessary feedback, so that your remodeling professional can address any existing problems with you before the work begins.

EFFICIENTLY HEATING AND COOLING YOUR HOME

If you are planning to install a new heating system or central air conditioner, be sure to ask about the Efficient Heating and Cooling Initiative. By installing high efficiency equipment, you are able to increase the comfort of your home and lower your energy bills.

Focus on Energy works with eligible Wisconsin residents and businesses to install cost effective energy efficiency and renewable energy projects. Focus information, resources and financial incentives help to implement projects that otherwise would not get completed, or to complete projects sooner than scheduled. Its efforts help Wisconsin residents and businesses manage rising energy costs, promote in-state economic development, protect our environment and control the state's growing demand for electricity and natural gas. For more information call 800.762.7077 or visit focusonenergy.com.
